TIPS FOR RECORDING YOUR VIDEO

INDUSTRIAL TUBE

CHECKLIST

EQUIPMENT:

- Is your mobile phone charged and the screen saver turned off?
- Are all necessary tools and materials available?

CONTENT:

- What is the core message of your video?
- Make sure you have a fitting and concise title for your video.
- Which points would you like to address in concrete terms?
- In which order do you want to show these steps?

Important: Please pay attention to the protection of trade secrets.

LOCATION:

- Do you have permission to film?
- Have you observed all safety guidelines?
- Is the environment you have selected free of background noise?
- Do you need help shooting the video from a second person?

Important: Pay attention to the lighting conditions and check them during a test shot.

GENERAL INFORMATION:

- Please hold your mobile phone horizontally (do not film in portrait format).
- Speak slowly, loudly and clearly during recording. Use bluetooth microphone for better sound quality.
- Try to work using slow movements. Avoid fast camera pans.
- Please note the maximum length of the individual recording steps (a maximum of 90 seconds/recording).

Important: Individual recording steps may not be deleted.

We are looking forward to helping you with further tips:
